Fizika

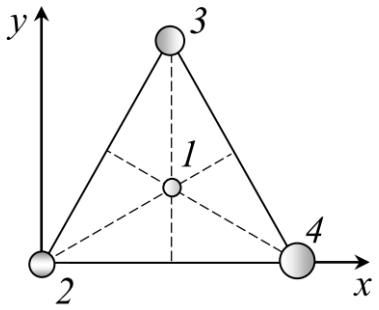

1. Sistemaning og'irlik markazi *2m* massali sharchadan qanday masofada yotadi (1–rasm *a*) ?

2. Tomonlari 20 sm dan bo'lgan teng tomonli uchburchak uchlarida va markazida joylashgan, massalari $m_1 = 100\ g, m_2 = 200\ g, m_3 = 300\ g$ va $m_4 = 400\ g$ bo'lgan to'rtta sharchadan iborat sistema massalar markazining koordinatalarini toping. Koordinata o'qlarining yo'nalishini 2–rasmdagidek tanlab oling.

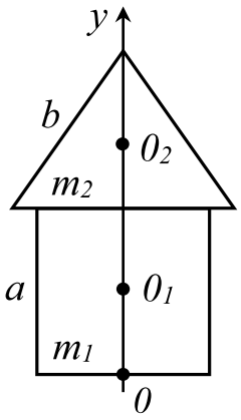

3. Fanerdan qirqib olingan, tomoni 20 sm bo'lgan kvadratdan hamda tomoni 30 sm bo'lgan teng tomonli uchburchakdan iborat uychaning og'irlik markazini aniqlang (3–rasm).

1-rasm

2-rasm
